

Researchers at the Institute of Neurology (London), lead by Dr Giunti aim to find the gene that causes SCA11. They already are in contact with a number of families with SCA11, but to further their research they need more volunteers. If you have an unidentified form of ataxia and five or more family members are affected you may be able to take part in this project.

For more information or if anyone would like to take part in this research project email [research@ataxia.org.uk](mailto:research@ataxia.org.uk)
